

REMARKS

Entry of the above amendment is respectfully requested in view of the following remarks. A Notice of Allowance has been received for this application.

Applicants wish to thank the Examiner for notifying the undersigned of the error in the page and line number for the amendment to the specification which was requested in a previous submission received by the PTO on February 21, 2006. In the February 21, 2006 submission, the undersigned was attempting to correct a typographical error in the name of a compound recited in the specification, but the incorrect page and line numbers were stated. The amendment provided herein cancels the previous amendment, and repeats the same request for correction of the typographical error of the compound name but states the correct page and line numbers for the location of the amendment.

Briefly stated, the specification is requested to be amended to correct an obvious typographical error in the chemical name of compound (1) at **page 26**, i.e., the "11" at the start of the name has been changed to "1." The correct name appears in Example 39 of the application, as well as in several other places such as at p.19, lines 1-2; p. 21, lines 6-7, and in claim 15, compound (29). No new matter has been added to this application by this amendment.

As this application has already received a Notice of Allowance, it is respectfully requested that the amendment noted above be incorporated into the text of the final issued patent if at all possible. If the Examiner has further questions or concerns regarding this application, he is invited to telephone the undersigned attorney at the number below.

Respectfully submitted,

By:   
Carol S. Quagliato, Reg. No. 35,330
